

Variety trial 2023

yield analysis

Jesse Bealsburg

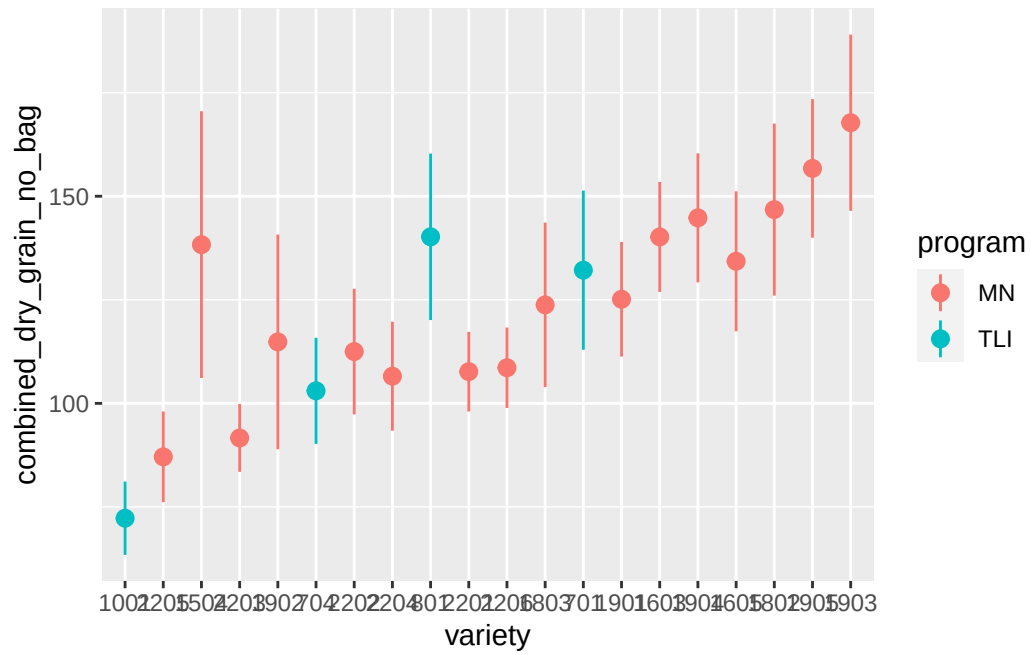

2025-08-18

objective

determine higher performing lines from 2024 data

```
library(tidyverse)
read.csv("MASTER Variety Trial 2023 Plant - yield.csv") -> dat

dat %>%
  filter(site!="Waseca") %>%
  mutate(
    variety=factor(variety),
    variety=fct_reorder(variety,combined_dry_grain_no_bag,
                        .na_rm = TRUE)
  ) %>%
  ggplot(
    aes(variety,
         combined_dry_grain_no_bag,
         # shape = site,
         col = program)) +
  stat_summary()
```

- Top variety is 1903 from UMN
- top variety is either 701 or 801
